

Dear Hiring Manager,

I am writing to apply for the Java Full Stack Developer position at Capgemini.

I graduated with a Bachelor of Science degree from Kakatiya University in 2025 and have been actively building my skills in Java Full Stack Development. Through hands-on projects and internship experience, I have gained practical knowledge of Java, Spring Boot, React.js, MySQL, REST APIs, Git, and Docker.

One of my major projects is TicketPro, a Helpdesk Management System where I developed REST APIs, implemented role-based authentication using Spring Security and JWT, integrated MySQL databases, and built responsive user interfaces using React.js. I also developed an Online Compiler project with code execution and test case evaluation features, which strengthened my understanding of backend development, API integration, and problem-solving.

I am interested in joining Capgemini because of its strong learning culture, innovative technology projects, and opportunities for professional growth. As a fresher, I am eager to contribute my technical skills while learning from experienced professionals and working on impactful projects.

I am a quick learner, adaptable, and committed to continuous improvement. I believe my project experience, technical foundation, and enthusiasm for software development make me a strong candidate for this role.

Thank you for your time and consideration. I would welcome the opportunity to discuss my application further.

Sincerely,

Venu Babu Banala

Java Full Stack Developer
